Agenda Item Title: Electric Motor Repair/Rewind Services for WPC

Prepared By: Robert J. Case, WPC Supervisor

Background/Summary of Proposed Action:

WPC utilizes a large number of electric motors of multiple voltages, ranging from fractional horsepower to 1750 horsepower, to operate the many pumps and other wastewater treatment equipment. When the motors become worn or fail, it is usually more cost-effective to repair or rebuild, rather than replace, them. Keeping these motors reliable and functional is critical to the continuous operation of the treatment process.

Financial Implications:

There is adequate funding for the purchase order in the FY2013 yearly O&M budget account. The account numbers are 590-550.200-775.000 (\$3,500.00) and 590-550.202-930.000 (\$17,000.00).
