Department of Purchases & Supplies

Sheldon A. Neeley

TO: All Proposers
FROM: Lauren Rowley, Purchasing Manager
DATE: **July 27, 2026**
SUBJECT: **Addendum #01 – P27000003: SUPPLY PHOSPHORIC 75% ACID**

This addendum has been issued to address the following Q&A:

Q1.) Are all deliveries made in 1,600-gallon totes for 90,000 gallons?

A1.) No, our maximum BULK delivery amount is 1,600 gallons at a time, due to the size of our BULK Storage reservoir. (Our yearly anticipated usage is only 3,500 to 5,500 total gallons.)

Q2.) There an option to deliver in Bulk Tankerloads?

A2.) Yes, BULK tanker load is the only option.

Q3.) On page 24 under the Heading General Conditions – Quantities the document states: The City of Flint estimates ~ 90,000 gallons annually. Is that correct?

A3.) This is a mistake, the actual anticipated usage of Phosphoric Acid 75% is only 3,500 to 5,500 gallons annually.

Q4.) On page 22 in the Box States: Phosphate 75% NSF Grade Bulk Delivery of 1,600-Gallon Totes at a time.

A4.) BULK Delivery, maximum amount received can only be 1,600 gallons due to size of BULK Storage reservoir.

Q5.) What volume in the bulk tankerload is the usual amount? (lbs or gallons)

A5.) 1,500 to 1,600 gallons.

Q6.) What is the estimated usage for the totes per year?

A6.) For clarification, NO totes are needed, just BULK tanker delivery. Sorry for the confusion from a previous RFP! We estimate Bulk tanker delivery of 1,500-1,600 gallons per delivery, approximately once every 3 months.

Q7.) Does this mean Flint MI is receiving fifty-six (56) 1,600 -gallon totes per year?

A7.) No, just 3-4 deliveries of 1,500 - 1,600 gallons BULK

Q8.) What does it mean Container Deposit \$_____ Is this the Cost to Flint MI for tote returns?

A8.) No containers, no returns needed for the City.

Q9.) How are deliveries received?

A9.) The City of Flint Water Plant has outdoor cam lock hookups for delivery trucks to transfer by hose.
