County-Wide Recycle Day Event

Genesee County is pleased to announce a county-wide Recycle Day collection event for hard-to-recycle items such as household hazardous waste, electronics, and tires! The event is coming to Fenton High School and the Flint East Water Service Center on Saturday, June 8, 2019 from 10 AM until 2 PM.

The Recycle Day event allows County residents to bring materials in their vehicle to either location during the listed hours. Recycle Day staff will be available to assist attendees in navigating through the event site and to unload items from vehicles. Event organizers are requesting that attendees enter the Fenton High School site from Donaldson Drive (from Owen Road) or enter the Flint East Water Service Center site from eastbound Court Street (from Dort Highway). Appliances will not be collected at the Recycle Day event, however residents are encouraged to drop appliances off at Green for Life Environmental at 2051 W Bristol Road, Flint, MI 48507 between May 1st and June 8th during their regular business hours.

“We continually look for ways to improve the Recycle Day events. By collecting appliances the entire month prior to the event, residents are able to dispose-of their appliances in a way that better fits their schedule” says Derek Bradshaw, Director-Coordinator of the Genesee County Metropolitan Planning Commission. In 2018, approximately 4,600 residents attended Genesee County Recycle Day events and over 560,000 pounds of waste was collected.

For more information about the event, please contact the Genesee County Recycle Hotline at (810) 762-7744, email Recycle@co.genesee.mi.us, or visit www.gcmppc.org/recycle-day/. Additional Recycle Day event dates and locations are listed on the website.
