

Project C.A.T.T. EYE

Flint, Michigan

Police Department

Chief Timothy Johnson

Mayor Karen Weaver

Project C.A.T.T. EYE Flint

On October 3, 2016, the Flint Police Department (FPD) partnered with the Downtown Detroit Partnership (DDP), for the Flint Sprint campaign. The goal was to follow the successful blue print of Project Green Light, from Detroit, established by the Detroit Police Department and made with FPD. The FPD's version of the program is called Project C.A.T.T. EYE.

Project C.A.T.T. Eye (FPD), is the first public-private-community partnership of its kind in the City of Flint. The Project design consists of real-time crime fighting and community policing aimed at improving quality of life, neighborhood safety, revitalization and growth of local businesses, and aiding FPD's effort to deter, identify, and solve crime. The acronym C.A.T.T. stands for Crime Area Target Team which consists of a dedicated group of officers who target high crime areas in the City of Flint.

Our pilot program consists of five local businesses which have agreed to install and maintain high definition (1080p), indoor/outdoor cameras. The businesses also agree to upgrade to high speed network connections capable of allowing consistent video streaming to FPD through leasing agreements with the dedicated vendor (Sonitrol). Lighting upgrades will be a part of the commitment each businesses has agreed to. The overall goal is enhanced customer oriented safety.

The anticipated launch for Project C.A.T.T. Eye Pilot program is March/2017. FPD's goal is to incorporate additional business partners as the year progresses.

Local business partners have agreed to provide for, install, and maintain external Project C.A.T.T. EYE signage including metal flag signs, door decals and a physical green light above their main sign.

Vendors

Sonitrol, has been a longtime partner of the City of Flint, more specifically an advocate for Law Enforcement. Sonitrol has provided a comprehensive package to offer, Project C.A.T.T. Eye businesses. See attached flyer for package pricing.

Crannie Signs is a local Flint based business. Its history of support for the city of Flint and Law Enforcement is reflected in each Thin Blue Line emblem placed on vehicles in their fleet.

Each business will display Project CATT Eye branding logos as well as display and activate a green strobe light atop the primary signage.

Local Businesses' Role

Cameras & Connectivity

Local businesses will purchase or lease and maintain high definition cameras and equipment that will provide video streaming into the Flint Police Department Real Time Crime Center. The approved vendor will be Sonitrol.

Visibility

Partners will ensure lighting at each location is adequate. Further, properties will display signage, announcing the site as a C.A.T.T. Eye monitored location.

FPD's Role

Monitoring

FPD will staff a real time monitoring crime center, who will monitor and analyze videos from the feeds. FPD will dispatch officers as necessary and utilize archived video in the solving of crimes. FPD will not be responsible to monitor each partner location at all times.

Responding

FPD will deploy officers to crime scenes as necessary, this is traditional. Project C.A.T.T. Eye will give responding officers updates about crimes in progress for first responders. Project C.A.T.T. Eye also gives FPD members the ability to proactively patrol in a more efficient way. Visually being ahead of crimes in some known hotspots, with the ability to forward resources, even without a call for service.

Progress Reporting

FPD will keep business owners abreast of crime statistics around their establishment and report on positive reductions at each location.

Real-Time Crime Monitoring Center

Monitoring Center, FPD will utilize the former City of Flint 9-1-1 Dispatch Center located in the Flint Fire Departments Station #1, next door to the Flint Police Departments Headquarters.

Testimonial

"Project Green Light is a great way to help make our neighborhoods safer. My employees and customers feel safer, less loitering takes place, and there has been significant decrease in crime and increase in business. This partnership with the Detroit Police Department helps improve the quality of life for Detroiters. I think it can do the exact same for Flint."

City of Detroit, Project Greenlight Partner

B.P. Gas Station Owner, E. Jefferson @ Alter Rd.

October 2016

U.S. Attorney Barbara McQuade:

"Project C.A.T.T. Eye promises to reduce violent crime in Flint by enabling well-lighted, camera-equipped gas stations and stores to provide a safe haven for the public to do business. Programs like this one not only deter crime from occurring on the property of the participating businesses, but also allow law enforcement to concentrate patrols on smaller geographic areas."

Sen. Jim Ananich:

"Law enforcement partnering with businesses and the community to keep people safe just makes sense. This is a proven, innovative way to help reduce crime and protect our neighborhoods. In fact, research has shown that this can cut crime in half wherever it's implemented."

SIGNS BY... *Crannie*

Flint Police Department
